

page name- community

functionality name - community members

Bugs-community members are not visible for student pov and admin pov as well

suggestion- make sure the members are shown for bith pov student and admin with proper pagination

page name - community

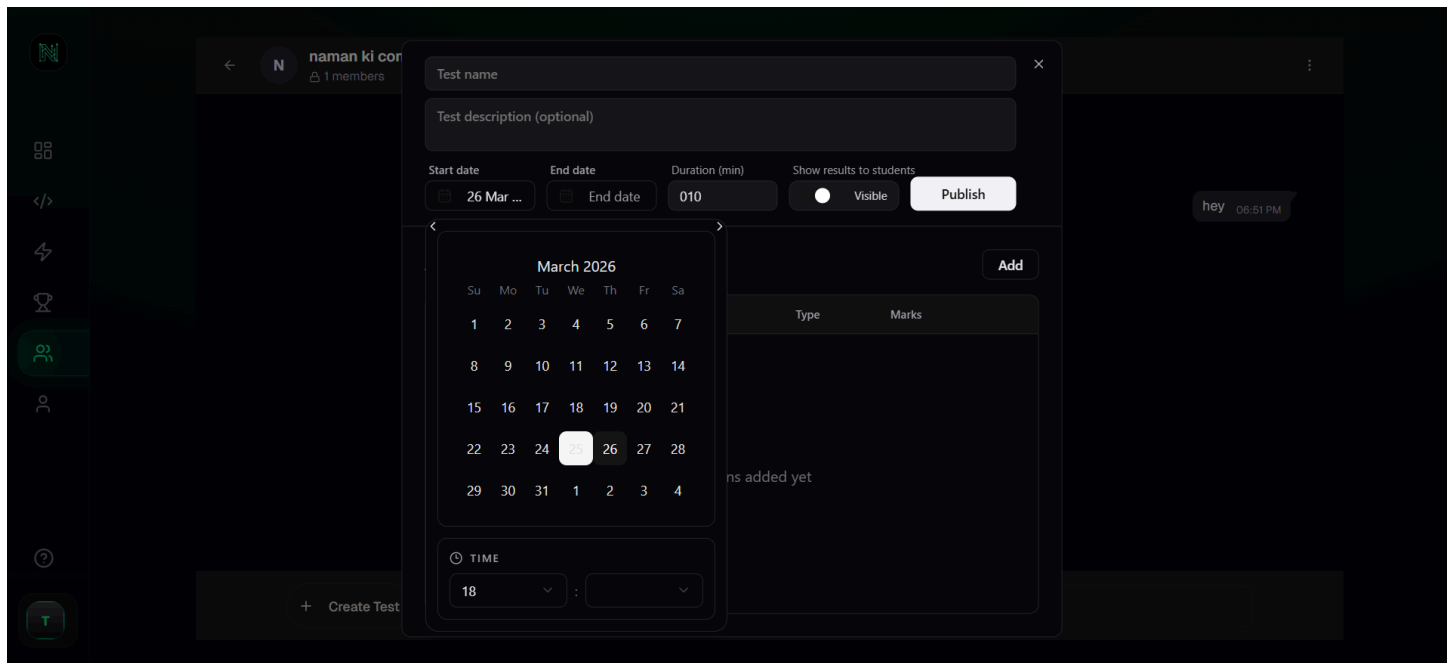

functionality name - create test

bugs- while creating a test the start date and end date of the test ui is not correct

- the test time is not correct it deafult to 9 which is wrong

suggestion- make a clean ui for start and end date for the test

-also make the default time , the time when user create a test. ex- if user create test at 9:00 so the default time automatically set as 9:00 then user can modify this accordingly

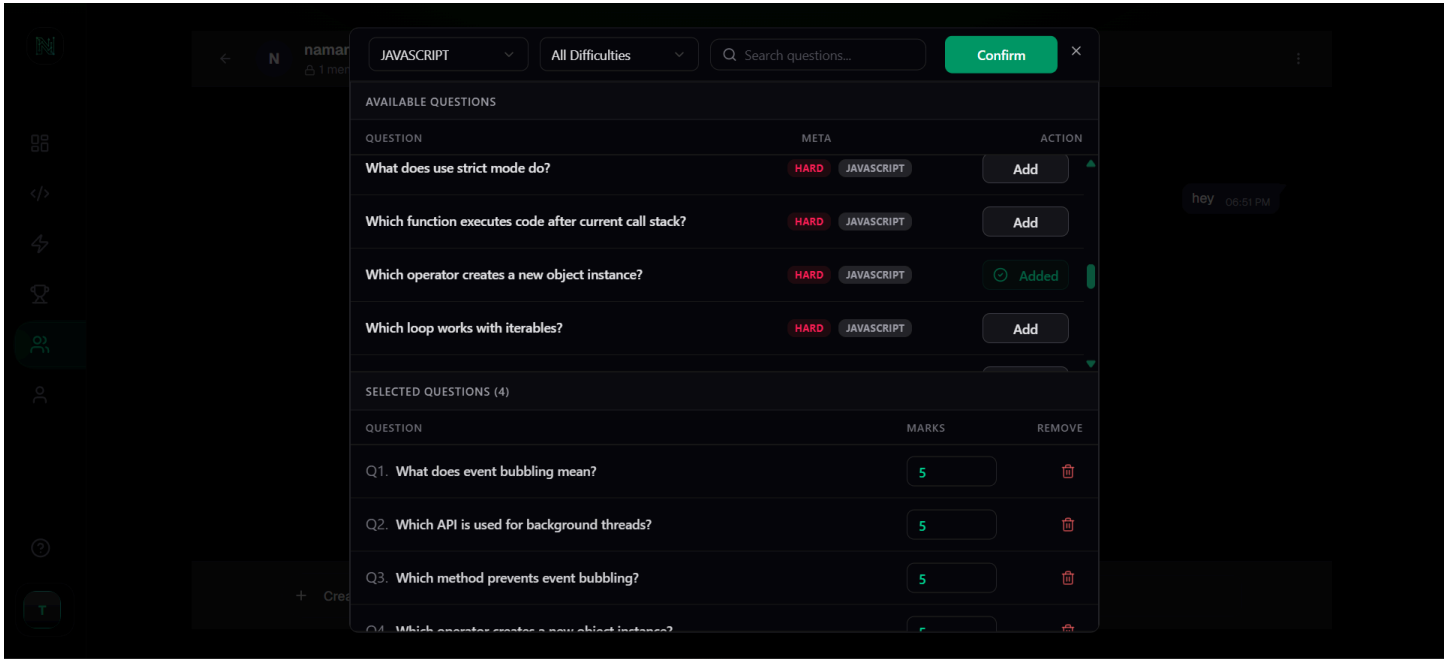

page name - community

functionality name-add question while creating a test

bugs- when an admin create a test , in selected questions the scrolling is not working properly

suggestion - make the scrolling optimized

-also reduce the pagination for question make it for 5 question instead of 8 question for easy understanding

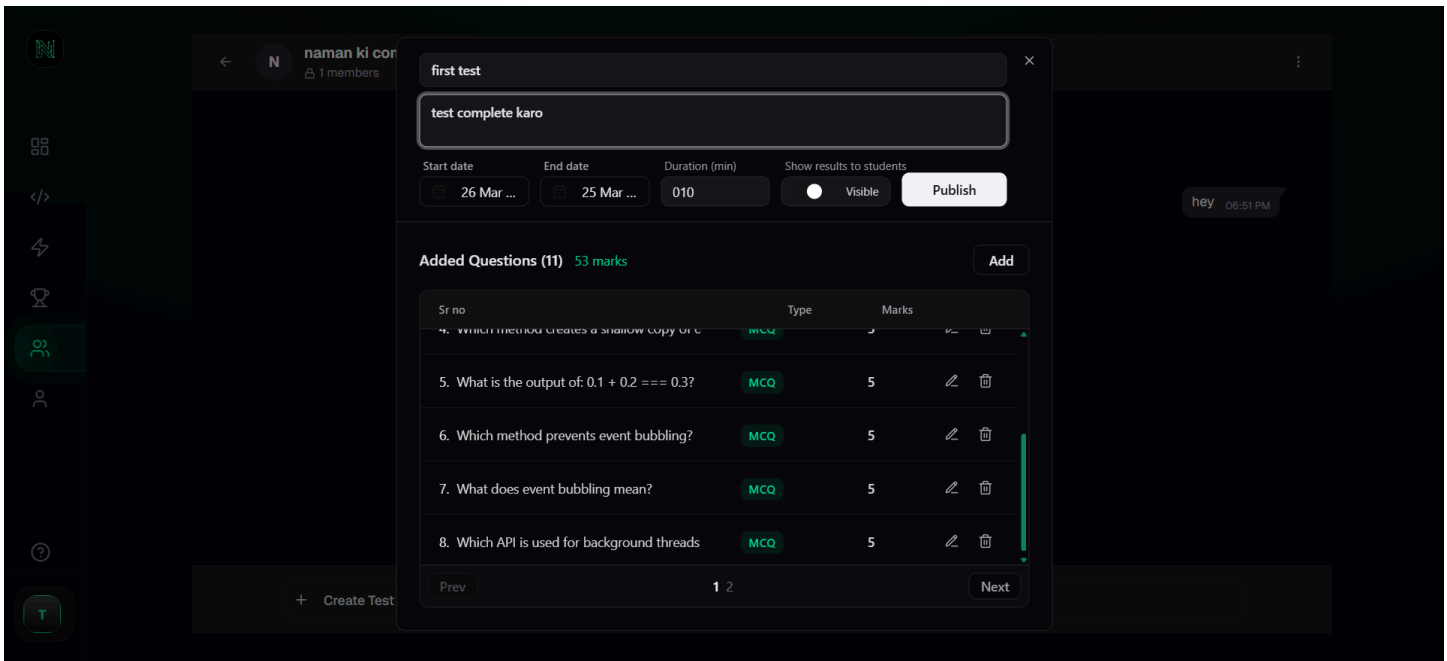

page name - community

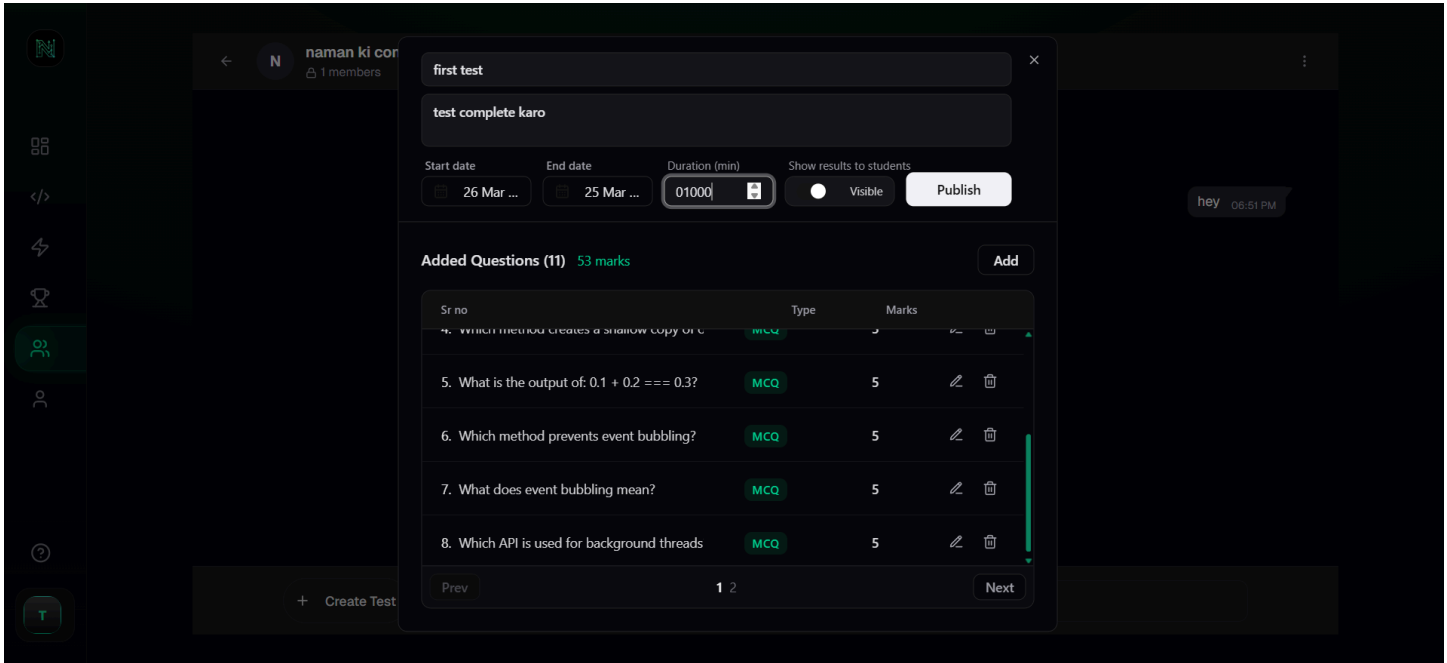

functionality name-add time duration in test

bugs- when i add time it starts from 0 like 010,020

suggestion - remove 0 from initial while adding a time duration for test

-also while creating a test the duration must have limits, as i see it goes to 1000

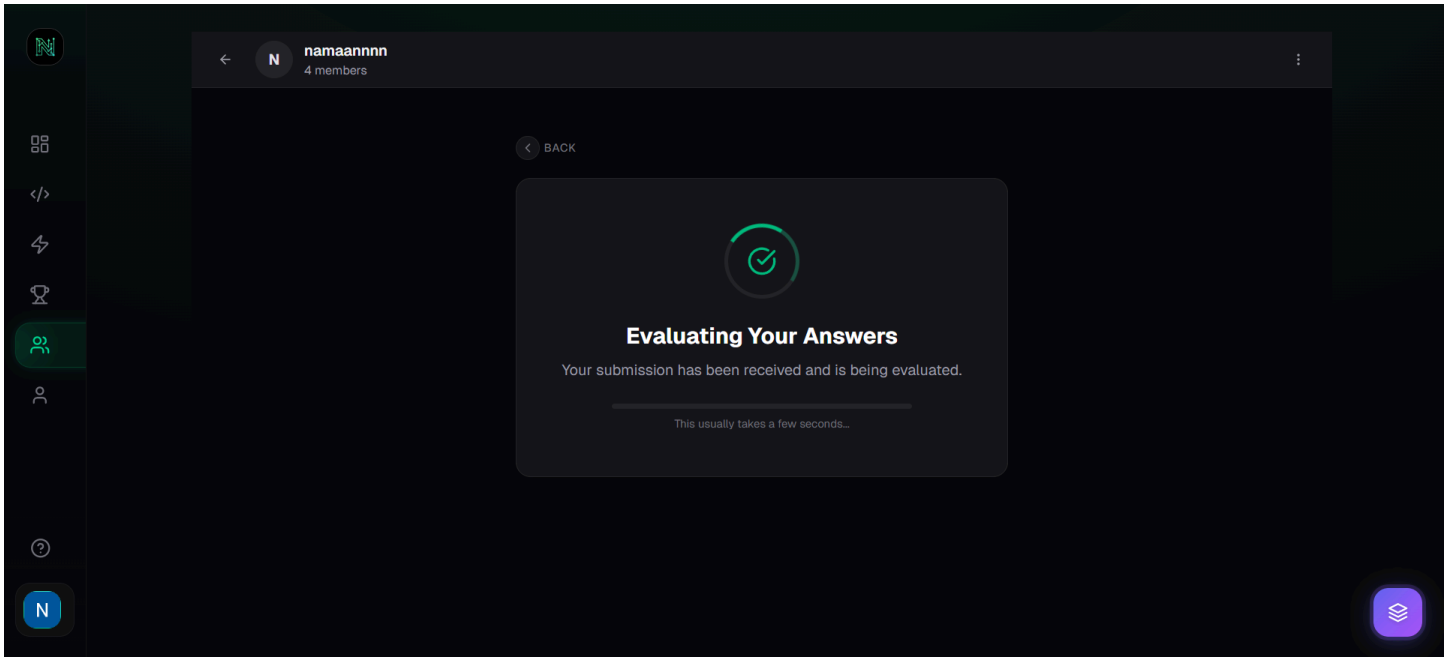

page name - community

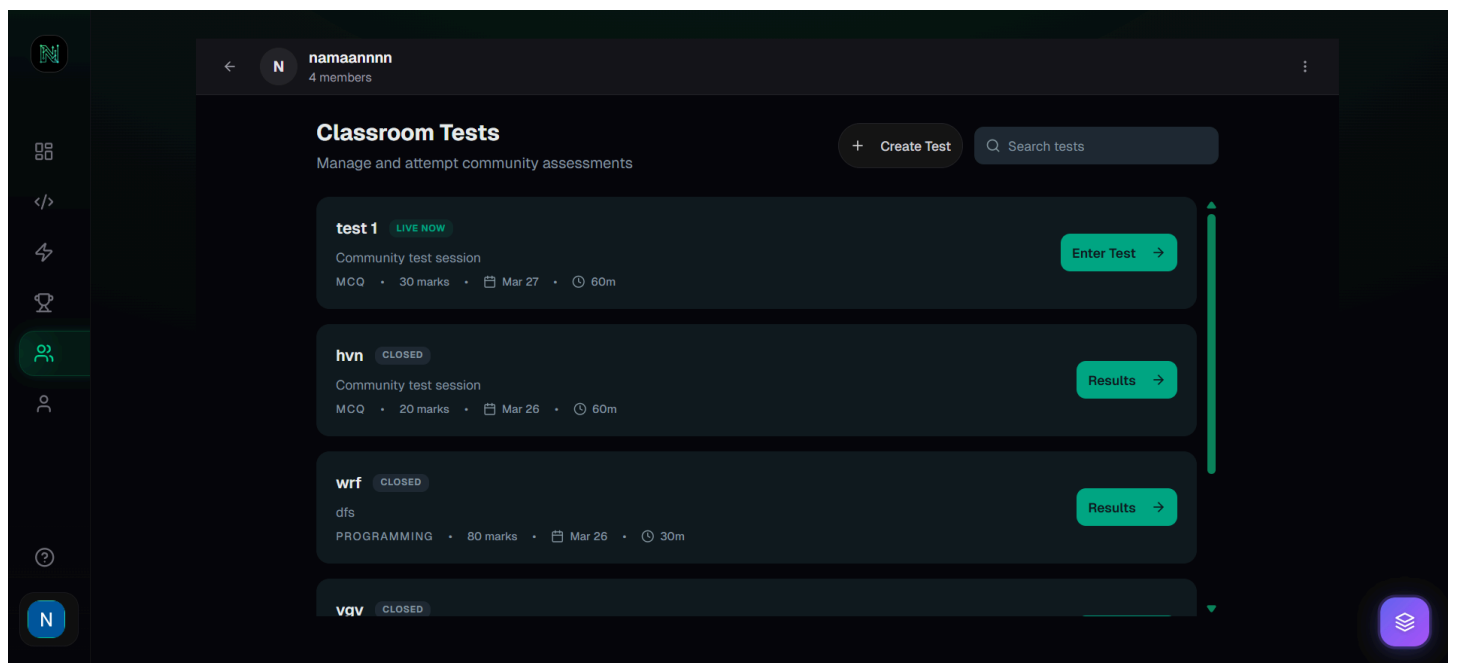

functionality name - test submission

bugs - when i complete the test it stuck in evaluation loading screen

suggestion- when user finish the test and click submit user should see the analytics

also when user done test then when they see the result it must says “results” not “enter test”

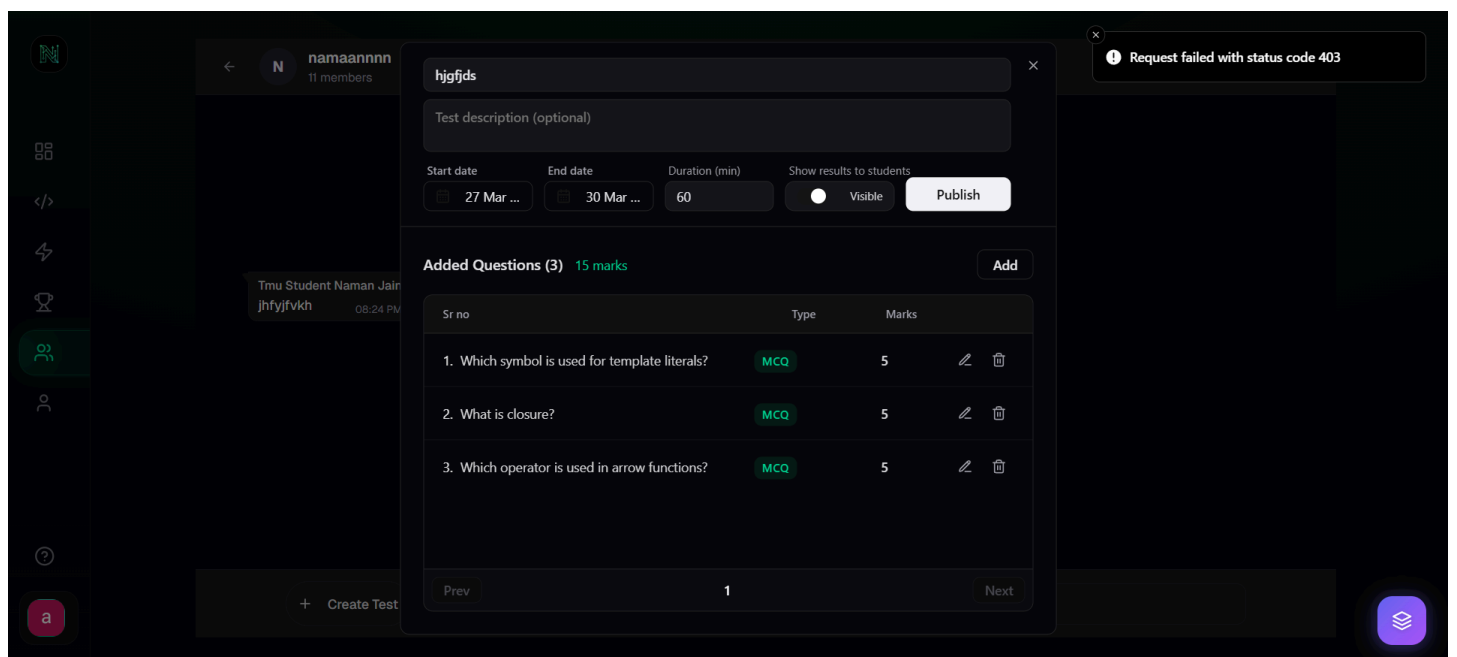

page name - community

functionality name = test creation

bugs- when admin enable the option anyone can create test . but still it does not apply only owner create test

suggestion - make others also can create a test and and make a sub owner role also owner only can create a test not take the test the sub owner can do both

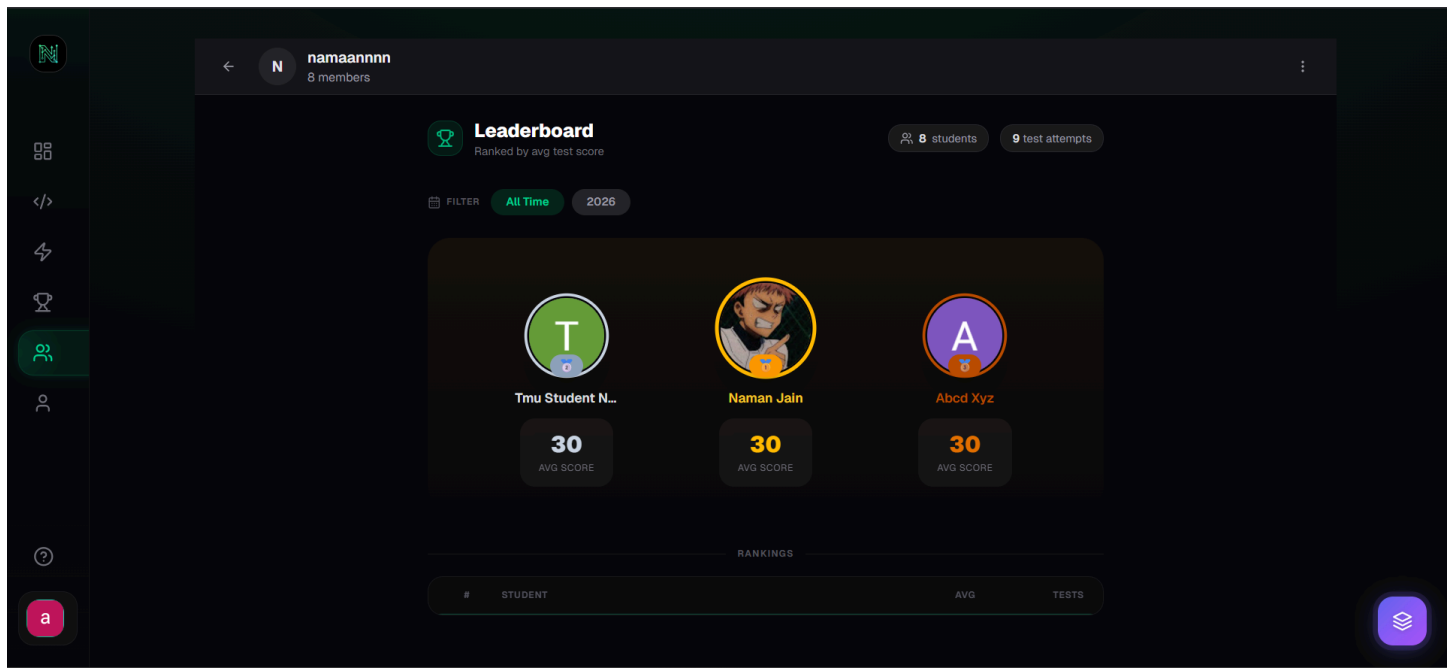

page name - community

functionality name - community leaderboard

bug- when i see leaderboard in community page the leaderboard only shows top 3 , rest are not shown ,

but in leaderboard page then select community specific leaderboard instead of global then the ranking the leadboard works fine

suggestion- make in community page the leaderboard in proper working and display all student

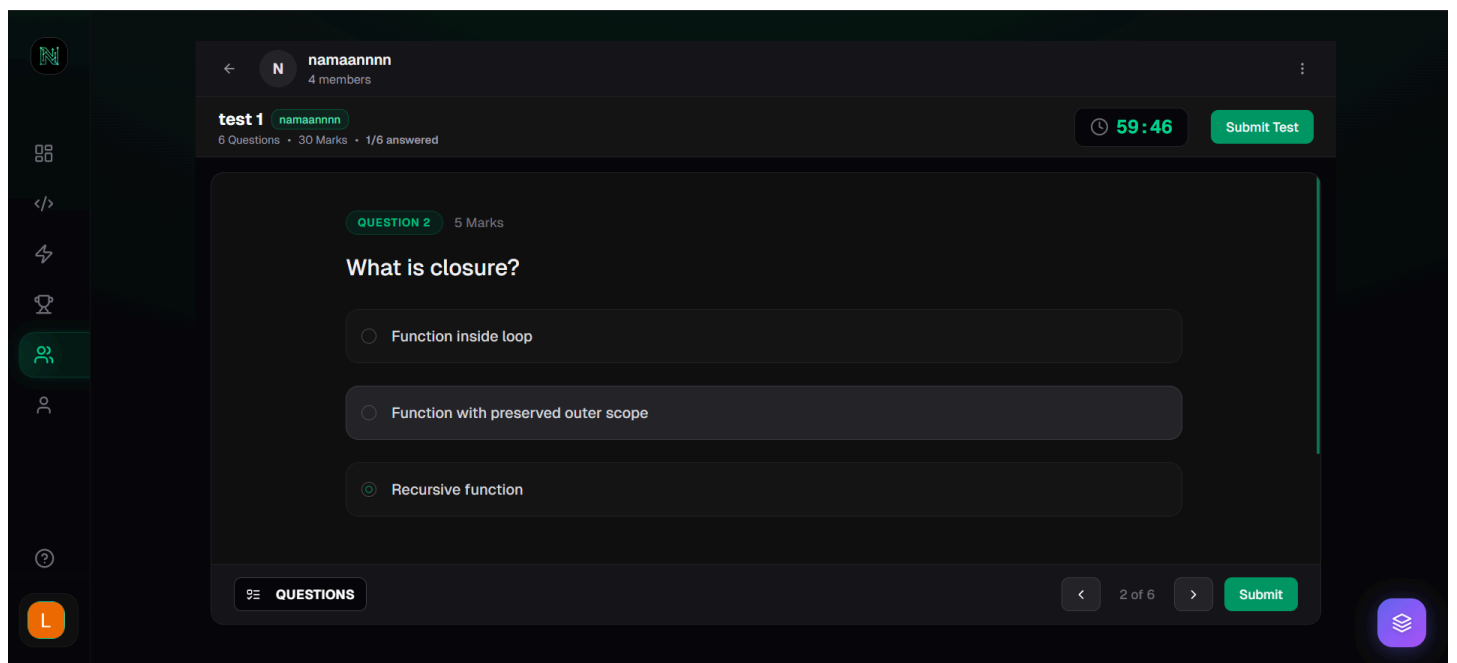

pae name - community

functionality name - attending test

bug - when user i attend test the open is already mark with random option , also the the scrolling is not proply used

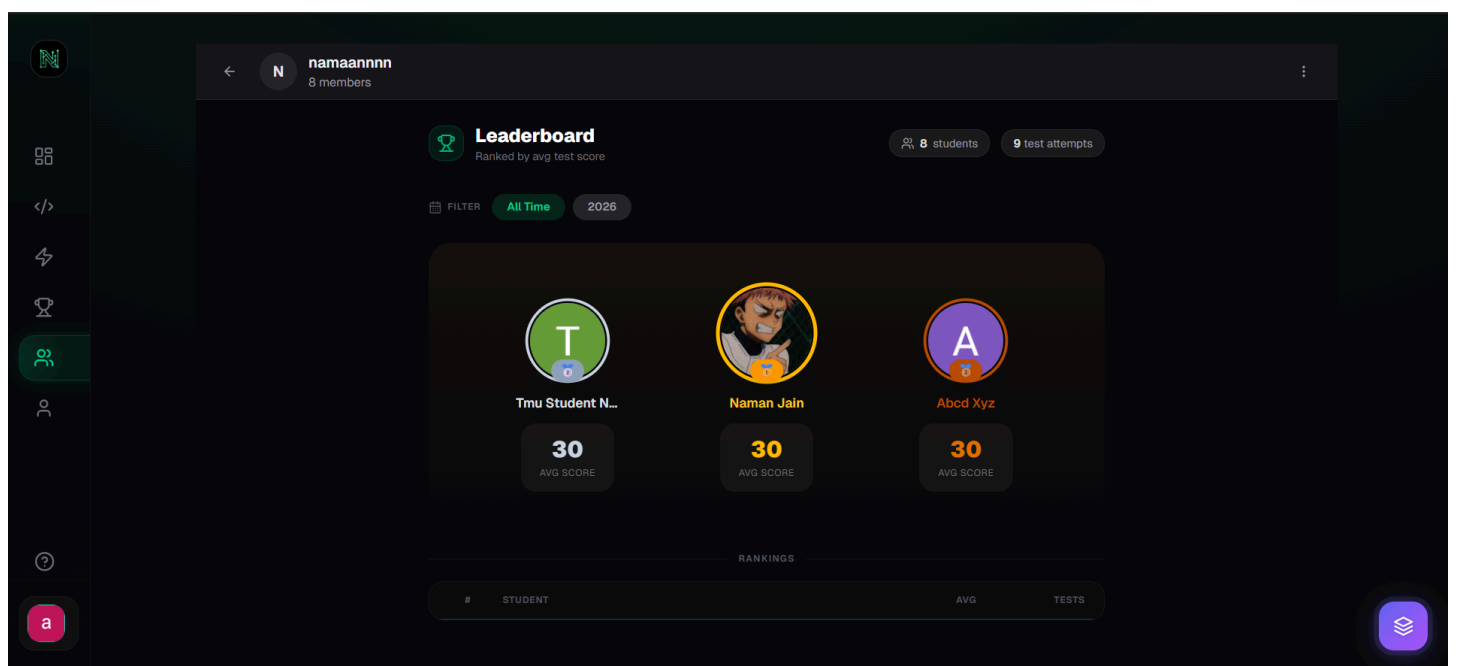

suggestion - when student attend the test , random option should not be marked all option should be clear , then student can mark their option , also revolve the scrolling issue all open are not visiblle in single frame only 3 option are shoen instead of 4

page name - community

functionalit name- community leaderboard

bug - 8 stident is shown but 9 test attempted WTF??

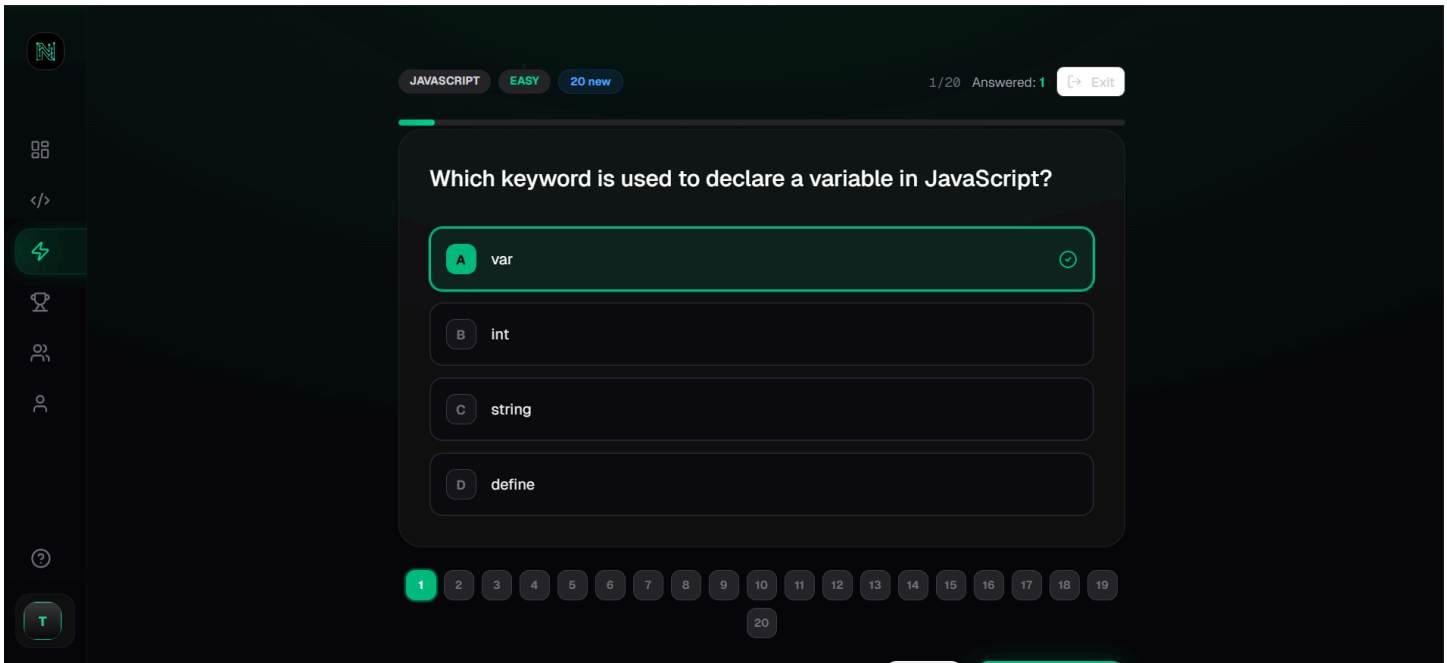

page name - practice arena

functionality name- mcq practice

bugs- not a bug but a ui issue the nesxt and submit button are visible until i scroll down to see

suggestion- make it user friendly where user can see next and submit button in first view without scroll down

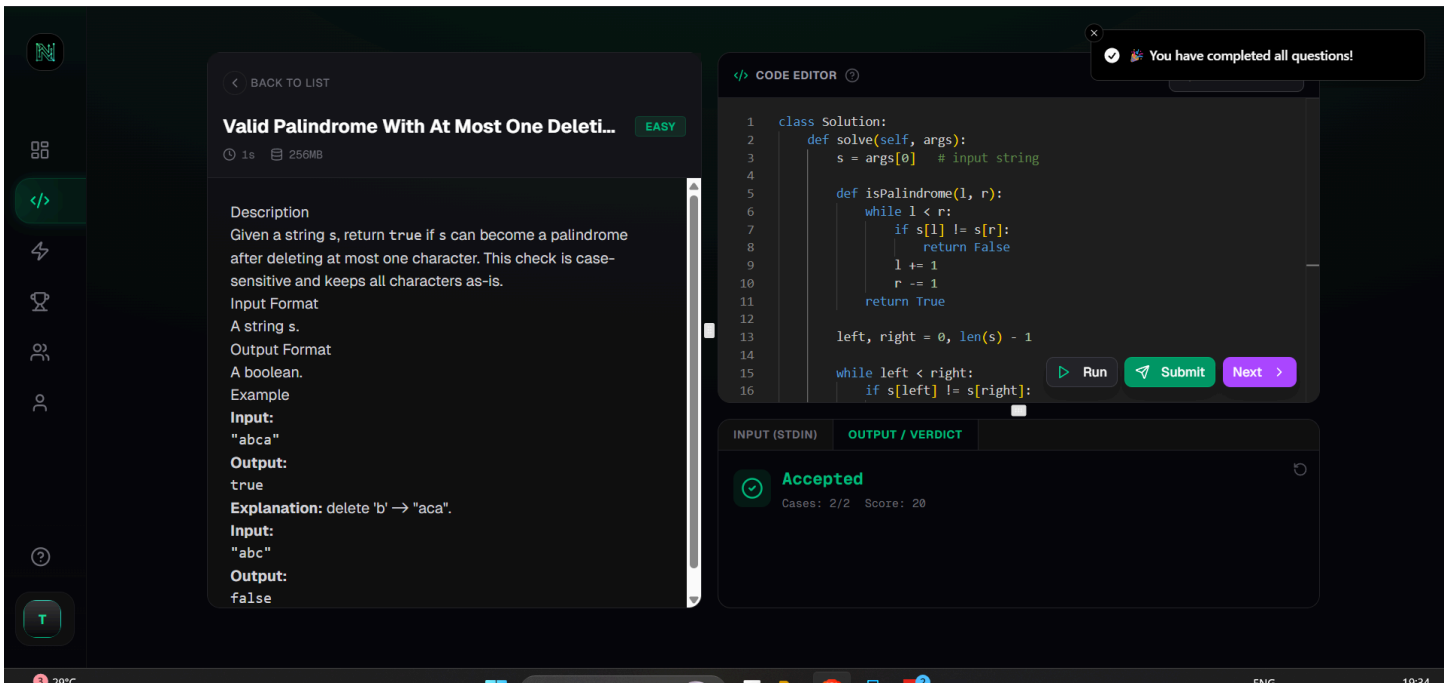

page name - problem set

functionality name - while attending dsa question

bug- again not a bug but ui issue when a i click submit it says “you have completed all question”

suggestion - remove “all” from the message “you have completed all question”

page name- problem set

functionality name - dsa question

bug - not a bug but compiler issue the compiler is very slow and gives error in test cases even the output is correct.

suggestion - need some optimization

The screenshot shows a coding platform interface. On the left, a sidebar contains navigation icons. The main area is split into two panels. The left panel displays the problem 'Right Side Visibility In Tree' with a 'MEDIUM' difficulty tag. It includes a description, input/output formats, and examples. The right panel is a code editor with a Python solution. Below the code editor, the output section shows 'Wrong answer' with a red 'X' icon and 'Cases: 0/2 Score: 0'.

Problem: Right Side Visibility In Tree (MEDIUM)

Description: Given a binary tree in level-order form (with null for missing nodes), return the list of node values visible when the tree is viewed from the **right side** (top to bottom). At each depth, only the **rightmost** node is visible.

Input Format: A binary tree as a level-order array.

Output Format: An array of integers.

Notes / Edge Cases: Empty tree returns []. Both BFS level traversal and DFS (right-first) work.

Examples:
Example 1 Input: [1, 2, 3, null, 5, null, 4]
Output: [1, 3, 4]

Code Editor (Python):

```
29         nodes[i].right = nodes[j]
30         i += 1
31     else:
32         i += 1
33         j -= 1 # adjust index
34
35     tree_root = nodes[0]
36
37     # Step 2: Level Order Traversal (BFS)
38     from collections import deque
39     queue = deque([tree_root])
40     result = []
41
42     while queue:
43         level_size = len(queue)
44         level = []
45
46         for _ in range(level_size):
47             node = queue.popleft()
48             if node:
```

Output / Verdict: Wrong answer (Cases: 0/2 Score: 0)

page name - profile and dashboard

functionality name - no of submissions

bugs -the infinite submission like if i solve 1 dsa question and click submit 3 times. it counts to 3 and shown in profile as well as dashboard

suggestions- make it 1 even student click submit button multiple times also remove the streak option from profile and dashboard

The screenshot shows a student dashboard for 'Tmu Student Naman Jain'. The dashboard includes a welcome message, an active streak of 0 days, and several performance metrics. The 'TOTAL SCORE' is 50, 'GLOBAL RANK' is #2, 'SUBMISSIONS' are 29, and 'ACCURACY' is 7%. Below these are three charts: 'ALGORITHMS (DSA)' showing 2/217 progress, 'PERFORMANCE SPLIT' showing DSA vs MCQ progress across difficulties, and 'KNOWLEDGE (MCQ)' showing 20/556 progress. The dashboard also includes a 'QUICK NAVIGATION' section at the bottom.

Welcome back, Tmu Student Naman Jain

page name- leaderboard

functionality name- leaderboard rank

bugs-my rank is shows #1 but in profile and dashboard it shows #2

suggestion - fix the ranking system in profile and in dashboard

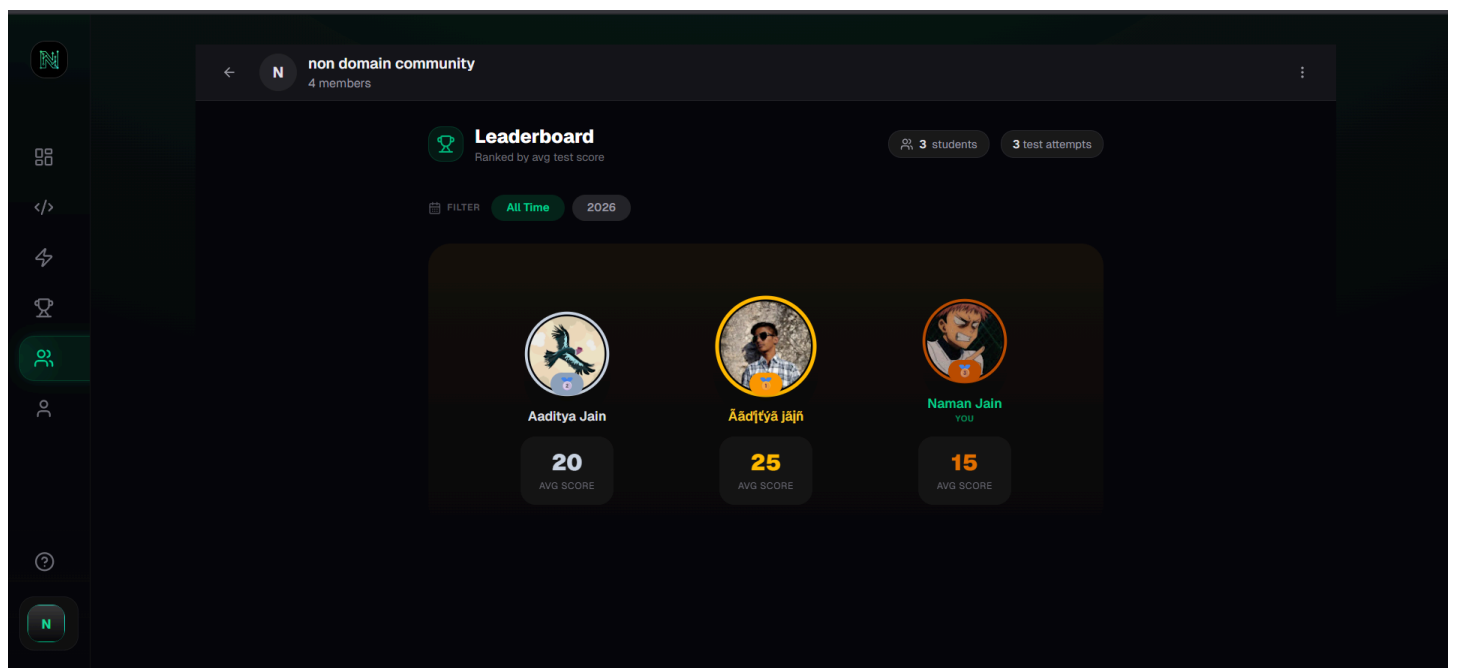

page name -leaderboard

functionality name- leaderboard display student

bugs- the members in community are shown 4 but the members are displayed 3 .

suggestion-in community specific leaderboard if a student have 0 score then the student should also be shown as a 0 grade.

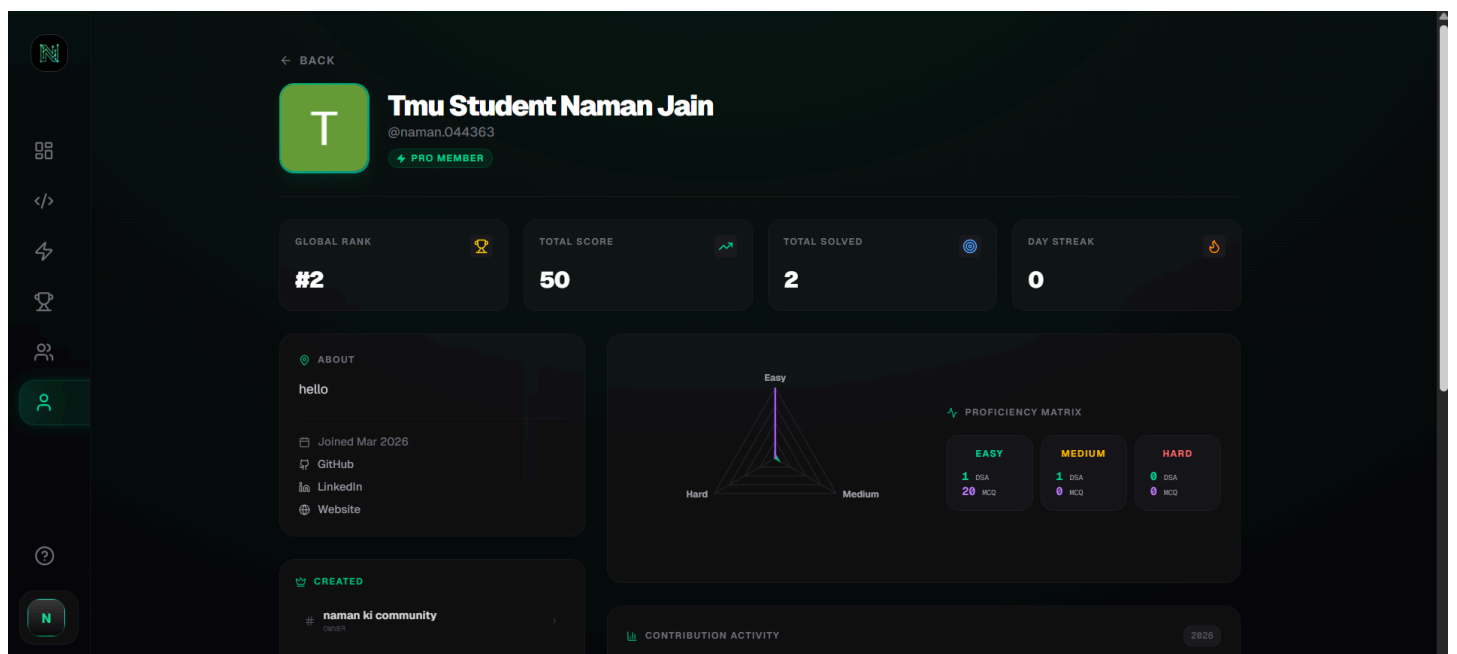

page name - profile

functionality name - created community and joined community

bugs-i joined multiple communities and created nultiple communities but in profile section it shows limited joined and created communities

suggestion-shows all created community in profile

-and in joined community add recent join not all communities joined

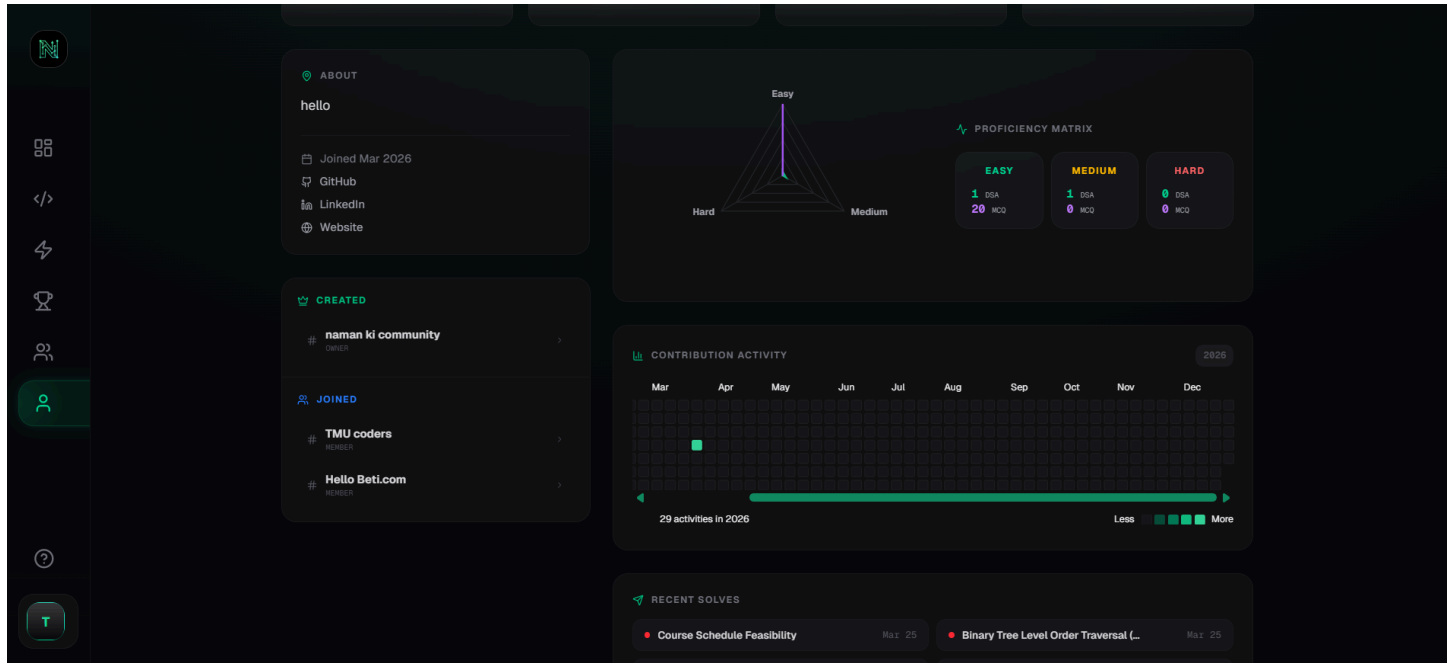

page name - profile

functionality name - contribution activity

bugs- not bug ,date is not shown when user contribute in contribution activity

suggestions - add date when user contribute in contribution activity

-and make the recent solve optimized if an user solve a dsa question or edit code then it must shown in recent activites otherwise there is no need for this

page name - profile

functionality name - contibution activity

bugs- when a user attend the test from community then the contribution graph didnt mark it

suggestion - when user only attend the test from community even user didnt atted the problem set is must mark in contribution mark . when user didnt do both problem set and test then the graph should not mark it
